DETAILED ACTION

Allowable Subject Matter

Claims 21 – 28 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 21, 23, 25, and 27 generally recite analyzing an audio signal and generating an image which indicate timing to be manipulated by a control member in a game machine wherein the analyzing and generation of the image are done in parallel. As shown in the previous action, the claims filed on September 02, 2005 were taught by Matsunaga. The new limitations now include the apparatus in a game machine and an further details including analyzing the audio signal based on its frequency and amplitude. Analyzing an audio signal with respect to its frequency and amplitude is notoriously well known in the art. However, the prior art fails to disclose performing this analyzing and generating the image which indicates a timing for an operator to manipulate a control member in a game machine with the analyzing and generating are performed in parallel. As such, the claims are considered to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
